

Manage your live recordings.

Niagara® SchedulStream lets you schedule and manage the date and time for live streaming events or recordings of multiple encoding sessions remotely using Niagara SCX®.

SchedulStream optimizes scheduling workflows by using streaming templates established for specific business applications. It is the perfect scheduling solution for broadcast, education and government users who create content for webcasting, Video on Demand and distance learning purposes.

Control preset scheduling

SchedulStream enables organizations to be more productive in their use of live encoding systems by:

- *Providing an intuitive web-based interface so you can schedule one-time, repeat and ad hoc encoding sessions*

- *Addressing the workflow needs of organizations looking to streamline the use of technology assets*
- *Extending the capabilities of your appliance's Niagara SCX web page to facilitate scheduling of encoder profiles*

Use SchedulStream to coordinate multiple encoders for training sessions; schedule remote classroom/conference room encoding; schedule batch encoding for broadband, dial-up and mobile customers; and simultaneously encode formats for distance learning applications.

Streamline the use of your media assets with SchedulStream.

Ideal Solutions

- > Broadcasters
- > Corporations
- > Government
- > Educators
- > Ministries

Applications

- > Webcasting
- > Live streaming
- > Distance Learning
- > Video on Demand

Key Attributes

- > Provides a web-based interface to allow users to schedule one-time, repeat and ad hoc encoding and streaming sessions
- > Automates both live and on-demand encoding and streaming of Niagara appliances
- > Addresses the workflow needs of enterprises looking to streamline the use of media assets
- > Initiates simultaneous encoding of multiple formats and channels
- > Simplifies the digital archiving of video content
